Description
    Hi,

    I have a problem with the hits (reads) counter of forum and blog posts with tikiwiki 15.3 after an upgrade of my debian host from wheezy to jessie

    the counter stays at "0"

    I was using tikiwiki 12.3 before the OS upgrade

    I first used tkiwiki 12.3 on the debian jessie and then upgraded to 15.2 and now 15.3 (tried 15.4 but encounter a LDAP problem ...)

    thanks for your help

    Thierry

Solution
    enabling statistics solve this situation ...
