Description

tikiwiki/stats does not work, and displays "An error occurred while performing the request."
However, I would expect, that it displays the statistics.
I use tikiwiki 16.2, mysqld is 5.7.17-0ubuntu0.16.04.1

It seems that the error happens in function site_stats() from lib/stats/statslib.php.
I uncommented every call to functions, in tiki-stats.php, to find the position with the error.

It seems that some sql statements are wrong, and only work with some relax settings.
mysql 5.7.17 uses sql_mode=only_full_group_by .

I took the select-Statement from line 235 and inserted it into mysql.
select SUM(`pageviews`) AS views, `day` AS unixtime FROM `tiki_pageviews` GROUP by
FROM_UNIXTIME(`day`, '%Y-d') ORDER by views DESC LIMIT 1;
ERROR 1055 (42000): Expression #2 of SELECT list is not in GROUP BY clause and contains
nonaggregated column 'tikiwikitestdb.tiki_pageviews.day' which is not functionally dependent on
columns in GROUP BY clause; this is incompatible with sql_mode=only_full_group_by

We group by date. However there are many seconds matching the same day.
So SQL does not know which unixtime to return.

```
select SUM(`pageviews`) AS views, ANY_VALUE(`day`) AS unixtime FROM `tiki_pageviews`  
GROUP by FROM_UNIXTIME(`day`, '%Y-No value assignedd') ORDER by views DESC LIMIT 1;
```

Solution

The solution is to tell sql that it should accept any_value().

```
select SUM(`pageviews`) AS views, ANY_VALUE(`day`) AS unixtime FROM `tiki_pageviews`  
GROUP by FROM_UNIXTIME(`day`, '%Y-d') ORDER by views DESC LIMIT 1;
```

```
statslib.php:234 to 260 $max = $this->fetchAll( "SELECT SUM(`pageviews`) AS views,
ANY_VALUE(`day`) AS unixtime" . " FROM `tiki_pageviews`" . " GROUP BY
FROM_UNIXTIME(`day`, '%Y-%m-%d')". " ORDER BY views DESC" . " LIMIT 1" ); $maxvar =
$max[0]['views']; //get min pageview number $min = $this->fetchAll( "SELECT
SUM(`pageviews`) AS views, ANY_VALUE(`day`) AS unixtime" . " FROM `tiki_pageviews`" . "
GROUP BY FROM_UNIXTIME(`day`, '%Y-%m-%d')". " ORDER BY views ASC" . " LIMIT 1" );
$minvar = $min[0]['views']; //pull all dates with max or min because there may be more than one
for each $views = $this->fetchAll( "SELECT SUM(`pageviews`) AS views,
FROM_UNIXTIME(`day`, '%Y-%m-%d') AS date, ANY_VALUE(`day`) AS unixtime" . " FROM
`tiki_pageviews`" . " GROUP BY FROM_UNIXTIME(`day`, '%Y-%m-%d')". " HAVING views =
'$maxvar' OR views = '$minvar'" . " ORDER BY date ASC" );
```
