Description

tiki-admin.php?page=textarea#contentadmin_textarea-2 is failing to show several plugins since r61597. For example, the SNARF plugin won't show if using search terms "content" or "snarf".

Since r61597, the full list of plugins is no longer displayed. One needs to write a search term or press Enter to have everything.

I tried reverting the change, but this causes a significant conflict.

Solution

Jonny fixed this in r62100.
