Description
When looking at version of the page the inline editing should be disable.

To reproduce, go to https://tiki.org/tiki-pagehistory.php?page=Roundtable+Meeting+2017+04
View a previous version (not the last one) on your screen.
You are able to edit the convene plugin.
This is wrong.

Inline editing (any editing) should be disable.
A warning (notice) should tell the user something like: "Editing is not permitted on previous version of a page. If you want to use this version and edit it, first rollback the page then you’ll be able to edit it."

Solution
Not relevant anymore
