Description

It is possible to discard others content when editing directly a plugin of a previous version of a page.

At : <https://tiki.org/Roundtable+Meeting+2017+04>

Load the page and keep it on your screen / browser (A).

Have or simulate another user that go to the page and edit the plugin convene and save their changes (B).

Go back to your screen (A) without reloading the page. (you don't see new input).

Edit, do changes and save.

The changes from the other user (B) are gone and they're only shown in history.

Plugin edit should start with a kind of "auto-refresh the content" then edit on "updated" content.
