- ✕ Update Tiki importer to support current MediaWiki XML spec

Description

I tried to import XML from MediaWiki (1.27.0) following this guide. Error:
"MediaWiki XML file version 0.10 is not supported."

Here's what i tried so far:

- 1) Create XML-Backup from MediaWiki
- 2) Tools->Importer, upload the original file
- 3) Error: Wrong MIME-Type
- 4) Edit XML file: add `<?xml version="1.0" encoding="utf-8"?>` to the top of the file (brackets changed for posting).
- 5) Tools->Importer, upload the modified file
- 6) Message: MediaWiki XML file version 0.10 is not supported.

Thanks for any suggestion, fix or workaround for this issue!
