Description
    After activating Theme Control and going to tiki-theme_control.php to configure the feature, if I click on "Control by Objects" then I go to tiki-theme_control_objects.php as expected. But if I click on "Control by Section", then instead of going to tiki-theme_control_sections.php, I'm redirected to the site Homepage. (Naturally, it's control by section that I want to use ;-) .)

    This is a regression. Trunk also has this problem. The navigation works as expected in Tiki 15. I didn't check Tiki 16.

Importance
    7

Priority
