Description

Slideshows can only be done based on a page and its headings. The proposition is to be able to do slideshows based on structures (without having to move through a structure and select slideshow on every page).

Solution

I've added a few lines (130-148) on tiki-slideshow.php and attached it.

However we need some developer to commit that patch (updated if necessary to current tiki codebase, which evolved since Tiki17).

Interesting!

I suggest:

- get commit access
- Make it optional: Create a new preference
- Add to Tiki trunk so it becomes an official feature in Tiki18

What do you think?

P.S. FYI PDFs from structures will be added any day now. PDFs can be used for slideshows too

Sorry this has been here for so long (and thanks **@Xavier de Pedro** for adding 24.x to it so it showed up!) but could you try and add this as a Merge Request in gitlab for us please? More info here
