Description

At the community site, just updated to Tiki 17, on <https://tiki.org/Tiki%2Bvs%2BXWiki> , the heading anchor icons work properly in Firefox (they are the correct size and display on hover), but they don't in Chrome or Vivaldi (they're too large and always display). (Both of these browsers, along with Opera, use the Blink rendering engine.)

Solution

I changed the bug status to closed because the broken behavior is only happening in the Firefox Developers Edition. Standard Firefox is ok.
