Description
Users cannot use Facebook and Twitter social network features because they cannot link their accounts to Facebook and Twitter.

Attempting to "Authorize" Facebook passes users to Facebook login, but this Tiki error occurs after redirecting to the Tiki site:

Error We were unable to log you in using your Facebook account. Please contact the administrator.

Authorizing Twitter passes users to to Twitter login, but after redirecting to the Tiki site, a fatal error occurs:

Fatal error: Uncaught exception 'ZendOAuth\Exception\RuntimeException' with message 'Could not retrieve a valid Token response from Token URL: {"errors":[{"code":89,"message":"Invalid or expired token."}]}' in [... snip ...]
/home/sites/tiki/melo/vendor/zendframework/zendoauth/library/ZendOAuth/Http.php on line 218

This bug prevents all Facebook and Twitter integration like sharing and using embedded feed plugins. This also breaks the "Login via Facebook" feature.

After submitting 2 fixes - from developers mailing list: I've made the changes to 17 in r63747 I wasn't able to verify the changes because one needs to register your site with Facebook, and I doubt localhost will qualify. Could someone test if this restores Facebook login functionality?

What are others thoughts about backporting this? I think 15 should get it, and maybe 12 as well? Brendan
