Description

Plugin List or TrackerList unable to show tracker items with category 50 (PDF) in dev.t.o

AFAIR, this used to work in previous Tiki versions (at least Tiki12 and presumably Tiki15)

See the edits I did on this page [PDF](#) :

<https://dev.tiki.org/tiki-pagehistory.php?page=PDF&newver=0&oldver=17>

However, in both cases, there were no results shown. There were items in the past assigned to category 50 (PDF), as shown here:

<https://dev.tiki.org/cat50>

See also this one added today:

Workaround: filter by subject content, and not by category. Then plugin list displays the expected tracker items (provided that they use the word PDF or mpdf, of course).
