Description

display a single chart with plugin sheet fails (with mode simple=y or n)

Related to this other bug report:

<https://dev.tiki.org/item6265> - "Page with many PluginSheet calls should respect their own uses of parameter 'simple=y/n' "

After bug6265 is fixed, you now display only the sheet which were displaying charts normally, but when shown in mode "simple=y" charts are not shown.

Well, in fact, chart is not shown even if simple=n.

How complicated is it to get the charts shown?
