Description

If user William creates wiki page Foo, then user Bob creates a copy of Foo named "Foo-ng" by using the "Copy" action on `tiki-listpages.php?cookietab=1`, the new wiki page's history will show William as the author of version 1 of Foo-ng, rather than Bob. While it would be useful to keep the copied page's history - including its authors - in the copy's history, this is misleading. If there is a single author mentioned, it should be Bob.

Solution

Fixed it in `lib/wiki/wikilib.php`
