### Description

Hi

On Tiki 17x :

<https://ibb.co/mw5qiR>

(As Admin I can see all the activated features) - no relation to the Admins group)

On Trunk:

<https://ibb.co/g1Lecm>

<https://ibb.co/fDQecm>

(Admin cannot see some features Admin groups checked or not)

All details here : [https://tiki.org/tiki-view\\_forum\\_thread.php?threadId=66964](https://tiki.org/tiki-view_forum_thread.php?threadId=66964)

Also reproducible at next: <https://nextdev.tiki.org/tiki-objectpermissions.php>

---

The show instance doesn't show it BUT instance is not the last version...

### Solution

r64791 but i don't understand why that code was added in r64530 in the first place?

## Workaround

Enable the "Show permissions for disabled features" checkbox on the tiki-objectpermissions.php page on the first tab. It will show all permissions then.

Thanks for reporting

What do you mean by "Instance doesn't show it BUT instance is not the last version..."? Which instance?

Bernard Sfez / Tiki Specialist 23 Nov 17 15:26 GMT-0000

On this tracker item, under "Demonstrate Bug" I create an instance to demonstrate the bug.

The tar used to create and update the instance is outdated. Jean Marc has been pinged and will take care of this so we test and reproduce on the last version of trunk. BUT that also means that back in august this regression wasn't committed yet. 😊

Thank you Jonny, I confirm that r64791 helps here.

Thank you Jonny solved here too.
