Description

I uploaded a picture at dev and I move mouse over the drag & drop zone.
It changed into a text field I could type in.

Very disturbing 😞

Seems to be related to el-finder (upgrade available)

Odd, but it seems to work ok no?

This is inside elFinder so would need a fix upstream anyway, so let's leave this one for now?

Bernard Sfez / Tiki Specialist 08 Dec 17 06:14 GMT-0000

Agree for now but It would be nice to have Tiki18 polished 😊

Is there a possible fix or workaround you can post here ?

Luis Henrique Fagundes 19 Jan 18 13:00 GMT-0000

I would say elFinder considers this a feature, not a bug. Once you pass mouse over the drop zone, it changes to a text field so you can paste either an URL or an image from clipboard. If you pass you mouse over any of the file related buttons below input text, it gets back to being a drop zone.

+1 to leave this aside for 18.0 release.
