

Longer term, especially since image galleries are deprecated, would be nice to change the SEF URL rewrite for the general galleries page to something more recognizable than "files". Especially since hierarchical galleries are allowed. Maybe "dirs", "directories", "folders", or "galleries" (if really gone) is appropriate. But I guess I should submit a "wish" instead of cluttering up this focused bug report 😊

(note: ShowTiki still not working. Get error on startup of missing third party extensions)

Workaround

None. SEF URL on Files simply does not work.
