### Description

On a tracker I set a tracker field file with option;

File Count : 1

Replace Existing File : Yes

I upload a file (all good)

I upload another file and now the dialog shows like I have 2 files for this item instead of the last one only.

(from the instance)

It is confusing for the user even if on save or create they will be only on file assigned.

It used to display only one and a single file from the start to the end.

### Workaround

This is a bit of a change in the process, but nothing critical and feedback explain properly that the latest one only will be saved.

### Importance
