### Description

Step to reproduce;

On my local I set file gallery to directory and set a directory outside www.

I uploading several files from within the file gallery.

When I try to delete some items. (one by one or several using the select box)

I got a white page on Safari and an error 500 page on Chrome.

A refresh bring me back to : tiki-list\_file\_gallery.php

*I couldn't reproduce on an instance (directory storage is not possible for an instance).*

My error log is empty.

My access log

```

Seems to work fine on my local, but i'm not sure what you mean by "using the select box".  
I tested using elFinder, list view and browse view... one by one and multi-selected.
