Description

When I configure Tiki with User Tracker, I can set «Tracker field IDs to sync the "real name" pref from» in tiki-admin.php?page=login

This is ignored. No synchronization happens.

Real Name for a user only synchronizes when the *user tracker* item for the user is created or updated 😞

We need a way of forcing synchronization of all users' Real Names after «Tracker field IDs to sync the "real name" pref from» is modified in tiki-admin.php?page=login
