Something is causing most of the control panels hidden

Currently in trunk, some JS code is adding to most of the control panels elements:

```html
style="display: none;"
```

causings them to be hidden after page completes loading.
Makes using admin control panels impossible.

I suspect something to do with the filtering of showing Basic / Advanced preferences got broken as a side-effect of the Bootstrap 4 transition.
Fixed by http://sourceforge.net/p/tikiwiki/code/66236 but new issue introduced by that commit.

Gary Cunningham-Lee 01 May 18 14:30 GMT-0000

This problem started one or two days ago, so commits in that period should be checked.

Thanks. Could be http://sourceforge.net/p/tikiwiki/code/66209 ?

Yes, probably so. I replaced the file with branch 18's version and no problem, so it seems something in that file is causing the trouble. I'm checking into it now.

Maybe adding two attributes of same name (class) can cause the trouble?
