### Description

I'm using the last LTS Tikiwiki version (18.1) on Apache 2.2/PHP 5.6/Mysql 5.5.

I configured Tikiwiki with "Web server" authentication method.

Using Firefox (no problems with Chrome), when I logout from Tikiwiki, the browser alert me with this popup:

"You are about to log in to the site "ww.example.com" with the username "admin", but the website does not require authentication. This may be an attempt to trick you.

Is "www.example.com" the site you want to visit?"

Looking at code, I found this suspect line (336) of "lib/userslib.php" :

```
header('Location: ' . str_replace('/', '//admin:@', $url)); // simulate a fake login to logout the user
```

#### Comments

Bernard Sfez / Tiki Specialist 30 May 18 16:11 GMT-0000

While this is a different issue it may be related or help to diagnose.  
On Firefox I couldn't add event to Tiki Calendar while I could on Chrome.  
(Tested on another Tikier, Tiki 15.7 Mac & Windows).
