- Plugin Tour broken in 19.x

Description
Tour doesn't work in trunk currently (to be Tiki 19) since the switch from Bootstrap 3 to 4, in a quick test of an existing tour. The first popup appears but the second doesn't. But according to the Bootstrap Tour site (https://github.com/sorich87/bootstrap-tour/issues/554) it should work so the library needs to be updated and then Tour retested.

Is this still a concern?

We use v0.12.0 but it is still broken, see:

Oh, that is weird, in composer.lock it indeed says it should use 0.12.0 but on my demo site it still loads v0.11.0 in fact even though it is updated daily?

Looks like the main js file `bootstrap-tour.js` might still be on v0.11 according to the comment block at the top... the minified one says it's v0.12 so i'll see if there's any difference...

Jonny Bradley 27 Nov 18 16:14 GMT-0000

Nope, still the same error message as with the unmagnified one:

```
> Uncaught TypeError: n.data(...).tip is not a function
> at o._showPopover (bootstrap-tour.min.js:22)
```

.tip is there on whatever this is, but it's a string not a function...

The version from dev-master (which confusingly says it's v0.12) seems to work fine, so i guess they just need to do a release?

Marc Laporte 27 Nov 18 19:31 GMT-0000

https://github.com/sorich87/bootstrap-tour/releases/tag/v0.12.0
https://packagist.org/packages/sorich87/bootstrap-tour
#v0.12.0

So they need to do a 0.13?

Using dev-master is not ideal but necessary in this case. As soon as a release is available, we'll can go back to a packaged version.

A two-page tour that I made in 2015 works normally now in branch 19, without any new editing, etc. 😈 so I'd say it's fixed now.
