Description
Hi,

On two installs of Tiki (18.1 and 18.2svn) it seems the Calendar feature 'Sticky Popup' is not working. Also just tested in Tiki 15.5, did not work either.

Settings > Control Panels > Calendar > General Features > Stick popup

Pop's up, but it disappears when you hover over it, so it makes clicking on links impossible.

Though, stick pop up is not even needed for this,. I just don't understand why the pop-up disappears when you hover over it.

Thanks,
Mike
