Description

Cannot upload images to file galleries on tiki.org anymore?

Wanted to upload simple little png screenshot but got:

Error

Data too long for column 'name' at row 1

Tried both the elFinder UI
and https://tiki.org/tiki-upload_file.php too

Under the uploaded preview thumbnail there appears also this message:
File upload failed: Forbidden

Ah, it seems only when I rename the screenshot file to something really really short it works then:
renamed Screenshot_2018-07-12 Roundtable Meeting 2018 07.png to Screenshot_2018-07-12.png

The name should not be limited to such a low number of characters, should it? If yes, then it should
state clearly before uploading that the file name has a limit to not confuse users...
