- ● Trackers, Radio field; It should be possible to have a default selected and it should be possible to have twice the same value

Description

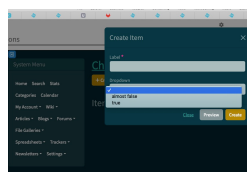

When using a dropdown tracker field (<https://doc.tiki.org/Drop-Down---Radio-Tracker-Field>) it is possible to set value with a label. But it is not possible to use the same value for different labels.

The following won't work and it would be useful if it could :

0=false,0=almost false,1=almost true,1=true

Still an issue in Tiki25, the last "of the same" value is displayed;
