Description

On the svn updating step when `make update` is ran there is an error reported:

```
...
Updating svn...
svn --non-interactive merge --accept theirs-full --allow-mixed-revisions --dry-run --
revision BASE:HEAD '/var/www/demo.luciash.eu/web/trimtesttiki18' 2>&1 [1]
svn: invalid option: --allow-mixed-revisions
Type 'svn help' for usage.
...
```

But it seems the script continues without fatal error then...

`svn help` reports `Subversion command-line client, version 1.6.11.`

## Comments

**Marc Laporte** 11 Oct 18 01:01 GMT-0000

I've seen that too.

@Ricardo: what is the consequence?
