Description

Hi:

I've hit this type of error 500 (using Tiki 18svn & php 7.2.9) several times in a wiki page with Plugin TrackerFilter, when the field shows a dropdown field, and I select one option in the dropdown before clicking at the export button:

```
[Wed Sep 05 16:58:24.138049 2018] [php7:notice] [pid 18063] [client ] PHP Fatal error:
Uncaught Error: [] operator not supported for strings in /var/www/tiki18farm/tiki-
export_tracker.php:84\nStack trace:\n#0 {main}\n thrown in /var/www/tiki18farm/tiki-
export_tracker.php on line 84, referer: https://example.com/foobar
```

Wiki code in the wiki page (in case it matters):

```
{trackerfilter trackerId="5" sort="n" showtitle="n" showlinks="y" showdesc="n"
shownbitems="y" showstatus="y" showlastmodif="y" showlastmodifby="y" showcomments="y"
status="opc" sort_mode="lastModif_desc" sortchoice="created_desc|Newest
```

```
first:lastModif_desc|Last modified first" max="-1" showpagination="y" allowtableexpansion="y"
more="y" silent="n" sortable="n" server="n" export_action="Confirm CSV Download"
filters="45/t:53/t:50/d:55/m" export_itemid="y" export_status="y" export_modif="y"
export_created="n" export_charset="UTF-8"}
```

Field 50 is a "dropdown with other" field, with options:

1-Pendent,1-Pendent,2-Encarregat,3-Treballant,4-Fet,5-Entregat,other=Altres

However, choosing some user from the dropdown of users (field55), also produces the same type of error (we are using Real Name display instead of username in trackers, etc)
