### Description

I tested Trunk on my Ipad (IOS11 Safari).  
The login popup for a default install is outside the screen (landscape and portrait).

It's possible to assign a Bootstrap class so that the dropdown opens to the left rather than right, if we assume the link is near the right margin. But I wish it could be "smart" via JS and be aware of the margin and automatically open to avoid the margin.

Thanks for the fix Gary !

The popup is now with a margin of half the right col from the edge.

I believe it would have been neater if it open on the edge of the screen but that's a fix. 😊
