Description

not OK: <https://nextdev.tiki.org/Staging-and-Approval>

OK:

<https://nextdev.tiki.org/Tiki17>

What could be killing the page?

<https://nextdev.tiki.org/tiki-editpage.php?page=Staging%20and%20Approval>

Solution

r67816 in 19.x (it was actually a bug in plugin trackerlist, so i have upgraded the difficulty to 6 because it is horrible - took about an hour ;)

p.s. Have updated nextdev.tiki.org and it seems ok now 🍀

Another example: <https://nextdev.tiki.org/Theme>

It could be a bug with the trim clone and upgrade which doesn't complete all the steps but that seems unlikely since other pages work.

The wishes plugin alias. When I comment the following section out it works:

☐☐☐☐☐☐

```
!!! Open {wishes filtervalue="188" status="o"} !!! Pending {wishes filtervalue="188" status="p"}  
!!!- Closed {wishes filtervalue="188" status="c"}
```

Good catch!

This affects hundreds of pages on dev and doc, and thus it's a blocker to upgrade these sites, and thus on the critical path to be a release blocker

I'm suspecting it's a trackerlist issue really, when trying to edit that alias i get an error:

" Tracker list_items ran out of memory after 0 items."

Will try and debug locally asap (we're taking this and the other one as being alpha release blockers too?)

Confirmed fixed. Will re-open if we notice something else.
