Description
    I have errors trying to access a file in a subfolder on dev.t.o on the file galleries.

    Using the main link to open the folder Bug Report Image => bsfez I have errors.
    Using the Tiki Explorer for the file galleries it worked.

    Not the same issue but may be related, I couldn't set a plugin img after uploading and setting the
    plugin following the process using the dialog modal from the Help plugin. I also tested on Safari and
    Chrome.

I tested on Tiki19 using nextdev.
nextdev is using elfinder and it worked better but still I had to retry several times to get over an error after the upload (may be due to nextdev setup ?):

Potential cross-site request forgery (CSRF) detected. Operation blocked. Reloading the page may help.

https://nextdev.tiki.org/item6831-test-file-gallery
Not sure I can add 19.x to this ticket... In doubt I didn't.

Solution

> Fixed
> -------
> Can see the error on dev.t.o regarding selecting a subgallery, but am unable to recreate locally. I notice that the url for the sub galleries in the main listing on this site are different than the urls in the side listing. I don't see that difference locally - both sets of urls are the same.
>
> Also unable to recreate the other issues regarding plugin img and anti-csrf messages. Can you confirm you are still having these issues?

Can see the error on dev.t.o regarding selecting a subgallery, but am unable to recreate locally. I notice that the url for the sub galleries in the main listing on this site are different than the urls in the side listing. I don't see that difference locally - both sets of urls are the same.

Also unable to recreate the other issues regarding plugin img and anti-csrf messages. Can you confirm you are still having these issues?
