Description

At : <https://dev.tiki.org/item6840-tiki-listpages-php-Layout-of-the-page-is-broken> in a comment I placed and img and set the thumbnail parameter to open a lightbox.

It opens the image in browser tab window instead.

I had the feeling I seen that (and reported) already but I couldn't find a ticket.

Hi Bernard,

I can confirm your issue, the problem lives when you use it in comments.
In wikipages content it works as expected. The same wikiplugin code in comments, opens the image instead of lightbox.

I'll provide the fix for it.

Hi Bernard,

I've just pushed <https://sourceforge.net/p/tikiwiki/code/68311> that will fix the lightbox issue reported.

Please let me know if it's ok.

Hi Jorge,

No it is still there : <https://dev.tiki.org/item6840-tiki-listpages-php-Layout-of-the-page-is-broken>.

Seems it is in comments as I see it is working in the description field at:
<https://dev.tiki.org/item6925-Avoid-displaying-buttons-or-item-when-no-action-is-possible>

Tested with : REV 68318

Hi Jorge and Bernard,

I suspect it is not applied because the comments are not in the DOM initially and are loaded via ajax call just *after* the Colorbox got already applied on the matching elements in the DOM. Is my theory

correct?

Hello Bernard,

The issue was also happening in the comments of wiki pages, and that one got fixed.
I'm going to fix the comments in trackers to support the lightbox.

Thanks

Hello Bernard and Luci,

This one will fix it: <https://sourceforge.net/p/tikiwiki/code/68319>
I've also tested in comments for blogs and forums.

ping me if any issue arises (not expecting)

Thanks

Awesome!

It works now! 😊

Thanks, you're da man! ?
