Description

I tried to use the img plugin using the tiki plugin help icon and modal.

<https://share.vidyard.com/watch/LGChQSQ8RXct7hCw1DS9Tx?>

May be related: I tried to use the plugin button and it looked like didn't work neither. By the time I was looking to find this ticket (2mn the code was in place). So there is a huge delay between clicking on the save button and the time the plugin code is inserted in the text area. I tried the same for the plugin img but it didn't worked
