Might be FiveAlive-lite theme specific.

You see this problem in Tiki 19? In my localhost branch 19, the drop downs do have a background color so there's no contrast problem, testing in the FiveAlive-lite theme with the Orange and Akebi theme options. The drop downs are standard div.dropdown-menu .dropdown-header and .dropdown-item, so should be colored the same as other drop downs in the interface in these themes.

As seen on https://dev.tiki.org/test-list it seems to be fixed already.
Thanks. Closing.
