Description

I set up a Tiki19 with user tracker information.

When I register ONE user the tracker is populated with one item but at tiki-view_tracker.php?trackerId=1 I see the same item twice.

They both have the same itemId.

Hi Bernard,

This issue also happens on 18.x , I've just tested. (not a regression)
Working on the fix.

Sounds like 18.x regression then. Added. When fixed we should backport it for 18.

Hello Bernard and Luci,

I've just pushed a 'fix' for this issue - <https://sourceforge.net/p/tikiwiki/code/68322>
The key defaultOrderKey was set but it was empty, causing a sort order 'f__asc'.

The fix should prevent that.

Jorge, good fix closing.
