Related-to

- ● CSRF False positives
- ● Potential cross-site request forgery (CSRF) detected. Operation blocked. Required headers are missing.
- ● "The following mandatory fields are missing: Category" after anti-CSRF prompt
- ● Voting in a poll gives CSRF warning.

Description

When I create a new site and I add the *switch\_themes* module, it does not show up. Instead, I get a "Module error" box (see picture 01) which tells me I need to activate the "users can change theme" feature.

So far, so good (except for the weird placement of the box in the bottom but that's off topic here).

When I check this "users can change theme" feature in the "Module error" box and save, I get a CSRF error and nothing is actually done 😞

That's the issue I report

See picture 02

Please, test it again at r68805 branches/19.x

Jean-Marc Libs 24 Jan 19 17:24 GMT-0000

Yes!

The issue is fixed as described.

Now about usability:

If admin is in "Basic" mode, no checkbox shows up in admin section 😞

A new bug entry? Shall we keep this one open?

Fabio Montefuscolo 24 Jan 19 18:20 GMT-0000

Ok, another adjust to this issue too. Please, check it again!

Jean-Marc Libs 02 Apr 20 20:55 GMT-0000

Sorry for missing the answer.

I just tried again in Tiki 21.0.

Perfect! Thanks!
