Description
Not sure since when but access to Google fonts (the Lato web font) fails now on all tiki.org sites.
This is reported in the Chrome browser console here:

⎘

Access to font at 'https://fonts.gstatic.com/s/lato/v14/S6uyw4BMUTPHjx4wXg.woff2' from origin
'https://dev.tiki.org' has been blocked by CORS policy: Request header field x-client-data is not
allowed by Access-Control-Allow-Headers in preflight response.

Update: seems it is back to normal. Works for me now.
