Description

It worked in 12.9 or so but since I upgraded the site to the latest 12.x LTS it stopped working.

Tested in 19.x too where it does not work anymore either. Will try to make 18.x instance...

This should work and open the link in Colorbox according to the documentation:

□□□□□□

```
[foo|bar|box]
```

Result:

bar
