Description

In a new post in the t.o forums I tried to set a plugin img using the help icon;

1. Uploading an image at t.o didn't work (cross error on elfinder)
2. Using an image anywhere on internet didn't work the plugin wasn't saved on the post
3. Writing the plugin syntax (manual) was saved but the result is a broken image and a correct image (image 1 on 2).
