Description

When I access the 'Show Instance' I created (<http://mikeua-11714-6595.show.tikiwiki.org/>) for a bug I filed (<https://dev.tiki.org/item6595-New-visual-menu-not-working-properly>) it says:

"Lost Tiki database connection

Sorry but there seems to be a problem connecting to the system's database

This may only be a temporary problem, so please wait a while and click

to try and go back to the home page

If it persists you should contact your system administrator "

Has anyone else had problems with 'Show Instances'?

thanks,

Mike

Solution

Sorry Mike, I had to restart the show server yesterday and mariadb failed to restart and I had not noticed. 😞

Thanks for reporting.

I restarted it and all show instances are available again.
