Description

Many of the icons seem to be missing from Plugin Icons and they are not showing on Tiki 19.0

Here is an example:

I started to fix some of the missing icons using the <https://doc.tiki.org/PluginIcon> page as a base. could take a while.

and i will also be modifying the PluginIcon page as i go along.

the majority is done. most of the missing icons should be brands, the most common ones are there.

Hi Benoit,

I saw in r68712 you fixed a load of these by hard coding the \"style\" prefix class for brands for instance, but did you know they would all work before if you specify that in a style parameter to the plugin or smarty object?

e.g. `{icon name="pinterest" style="brand"}`

Hey Jonny,

I think that just typing 'icon name="pinterest"' should be enough to display an icon while the extra parameters should effect styling (like what 'size' and 'rotate' do).

I doubt that regular users will know or expect that, for certain icons to show, you need to add the 'style="brand"' parameter. especially when its not mandatory.

Just my opinion ;)
