Description

The parameters "URIs where the banner appears only" and "URIs where the banner will not appear" are broken.

I tried in many way starting by the one from the help:

```
#/tiki-index.php?page=HomePage#
```

For "URIs where the banner appears only", once something is set the banner doesn't appears at all.

For "URIs where the banner will not appear", no matter what the banner is displayed.

Solution

Do we really need those 2 parameters ?

They are so many way to limit or control the display for a banner using Zone or modules.
