Description

On tracker Check Out:
Orders are correctly registered in the data base and correctly handled with payment
But in Cart Trackers

- If I buy one product it is registered in Orders Tracker
- If I buy several products the first one is registered in Orders Tracker ... the others are correctly registered in Order Items Tracker

Is this a BUG or a Configuration issue ?

Observed in the PROFILE Shoping cart configured from install.

Solution

It was a CONFIGURATION issue in

\$OrderProfile:new_order to \$WhateverTheOrderProfilePagenamels:new_order

Great to have a sandbox to reproduce

Easy to solve?
