Description
I have an issue where if my sub-headings exceed 9 then the auto-numbering and autoToc is screwed up.

This does not happen on first saved, rather after the next edit and save.

To replicate the issue:

1. Create new wiki page.
2. Add a H1 Heading, e.g. 'Section 1'
3. Add 10+ H2 Headings underneath the 'Section 1' Heading
4. Add another H1 heading, e.g. 'Section 2'
5. Save
6. Edit Wiki page
7. Save again

H2 Headings are OK unitl section 1.9 and then the system seems to add an additional hard coded 1.x on to the end of the auto number.
An additional hardcoded number is added with each subsequent edit & save.
