### Description

With 19.1, the LDAP and LDAP external items in the Admin->Log In 'option' is a bit (for lack of a better word) confusing and two check boxes are in the wrong place.

1) As mentioned in ticket 7035, the LDAP user field settings is in both the LDAP section and the LDAP external group section. If the LDAP user field settings do the same thing, I would believe the LDAP user field should be in the "external group section".

2) Relatedly, the "LDAP External group" I believe it really should be renamed "LDAP external source". (Though I would hazard a guess that even this isn't right... just putting it out here as a suggestion).

3) Under LDAP external group, in the "LDAP user" settings, the checkbox is wrong "Synchronize Tiki groups with a directory". This really moved to the "LDAP group" part.

4) Under LDAP external group, in the "LDAP group" settings, the checkbox for "Synchronize Tiki users with a directory" should be in the "LDAP user" part.
