### Description

When *Automatic indexing of file content* is active, trying to upload pdf files fails.

The pdf file is still uploaded but the end user is told that upload failed.

Try uploading pdfs in

[http://nycdwight-11908-6600.show.tikiwiki.org/tiki-upload\\_file.php?galleryId=4](http://nycdwight-11908-6600.show.tikiwiki.org/tiki-upload_file.php?galleryId=4) ! (beware of the 8MB size limit) (verify that *Automatic indexing of file content* is still active)

They display an error « File upload failed: SyntaxError: JSON.parse: unexpected character at line 1 column 1 of the JSON data ».

Only for pdfs.

This is an example return answer to `/tiki-ajax_services.php?controller=file&action=upload_multiple` :

```
<feff>{"files":
```

! Plugin Image

File not found.

The issue seems to be one or more invisible BOM (zero-length nonbreaking spaces) character before the json string.

My guess is, this regression is related to our changing the way pdfs are indexed. Since Tiki18, we use a php library bundled with Tiki. Before, we relied on a command line executable. Sadly, reverting to the old way of putting the following in tiki-admin.php?page=fgal#contentfgal\_admin-5 does not work:

```
application/pdf:                                pdftotext -enc UTF-8 %1 -
```

Additional info: Even though Tiki says the upload fails, the file is uploaded and it is indexed.

Wiebe 23 May 19 07:16 GMT-0000

I can confirm this bug
