Description
I think this is due to http://dev.tiki.org/Addons-Cleanup not done/finished entirely yet but if you had Addons enabled before and upgrade your Tiki to trunk (20.x) you will get fatal errors at some places like this:

Fatal error: Uncaught --> Smarty Compiler: Syntax error in template "file:/var/www/.../subdirs/tikitrunk/templates/tiki-forums.tpl" on line 112 "{$channels[user].name|addongroupname|escape}" unknown modifier 'addongroupname' <-- thrown in */var/www/.../subdirs/tikitrunk/vendor_bundled/vendor/smarty/smarty/libs/sysplugins/smarty_internal_templatecompilerbase.php* on line *112*

Solution
Several commits by jonny fixed this.
