Description

Steps to reproduce, for instance on dev.tiki.org :

1. View a tracker item as anonymous: you can't comment
2. Log in
3. Get back to the item report: you still can't comment. Even after shift-reload

Reasons:
The ajax response is cached by the browser.

Even if someone else adds a comment, you still can't see it.

It might affect all other ajax services.
