Description

Hello,

installed Tiki20-RC1 on my localhost and noticed that after I enabled SEF and then logged out, Tiki reported "Page not found Homepage". After re-login and disabling SEF everything was fine and then another admin-login, re-enabling SEF and then it worked out.

IIRC, the same behaviour I was also noticing when playing with Tiki20-beta, but then I was too busy testing/evaluating Markdown plugin. 😊

Sincerely,
Gour

Newly created instance shows the problem with 20.x release as well...username/passwd are set to admin2/admin2.
