Description

If a user is trying to use Mail-in and is not authorised to he will get an error message:

Mail-in auto-reply

Sorry, you can't use this feature.

This is good, but he will received the same message on and on and that may/will trigger the SPAM mechanism. It will classified or at list highly raised the possibility to have the domain used by the Tiki classified as SPAM.

There is an option: "Leave email on server on error: Leave the email on the mail server, when an error occurs and the content has not been integrated into Tiki."

If this is on, it will try and try again on the same email
