Description

It seems as if the button to import csv items has been broken: no action is taken when the user clicks at "import". In fact, nothing seems to happen.

See it reproduced in the show2.t.o instance of another bug report (sorry I felt lazy to create another 20.x one just for this):

http://xavi-9794-7124.show2.tikiwiki.org/tiki-ajax_services.php?controller=tracker&action=import_items&trackerId=6

u: admin

p: 12345

Download the csv of items from this tracker:

http://xavi-9794-7124.show2.tikiwiki.org/tiki-download_file.php?fileId=1

I first exported them, clear the list of items in the tracker, and attempt to import them again.

Many other scenarios do reproduce this issue, afaik; what I did was some of the easiest way to let you reproduce the bug.

Maybe we should delete this code and focus everything on Tabular Import-Export?

Xavier de Pedro 22 Jul 19 10:50 GMT-0000

imho, -1

For the same reason we didn't remove tiki surveys, tiki quizzes, tiki polls, when tiki trackers where developed.

They serve two different uses cases: 1) quick and simple (wiki-wiki) features ready-to-go with minimum clicks and without requiring the user to travel a steep curve to learn how to master trackers and tracker tabular format.

Simple csv export and import in Trackers shouldn't be replaced by a more versatile (but more complex to setup and learn how to use) tracker tabular.

My 2 cents.
